

PRONOV PANT

Senior Software Engineer · AI Agent Systems & iPaaS · Full-Stack · 4+ Years

Indore, India | +91 91792 91284 | pantpronoy@gmail.com | linkedin.com/in/pronoy-pant | github.com/pronoy1004

SUMMARY

Senior software engineer and acting engineering lead, 4+ years across enterprise iPaaS, multi-agent AI, and cloud-native microservices. Senior-most engineer at Langslide, owning a 13-service platform with 250+ integrations, 27+ LangGraph agents, and an MCP orchestration layer on GCP. Former Walmart Global Tech SDE III. MS, Rensselaer Polytechnic Institute.

TECHNICAL SKILLS

Languages TypeScript, JavaScript, Python, Java, SQL, C++

AI / LLM LangGraph, LangChain, OpenAI (GPT-4o), Anthropic, Google Vertex AI, Deepgram, RAG, PGVector, MCP

Frontend React 19, Next.js, Redux Toolkit, Zustand, TanStack Query, Vite, Tailwind CSS, React Flow

Backend Node.js, Express, FastAPI, Flask, Spring Boot, REST APIs, Microservices, OAuth2, JWT, RBAC

Cloud / Data GCP (Cloud Run, Pub/Sub, Cloud Scheduler), AWS, Docker, Kubernetes, CI/CD, MongoDB, PostgreSQL, BigQuery, Redis

PROFESSIONAL EXPERIENCE

Langslide Aug 2025 – Present

Senior Software Engineer Remote, India

- As the senior-most engineer, set technical direction for a **13-service** platform (TypeScript + Python), drove architecture and code-quality standards across the team, and turned client requirement calls directly into product roadmap.
- Scaled the core iPaaS engine from **30 to 250+ integrations (8x)** (Salesforce, HubSpot, Slack, Stripe, Google Workspace), with a workflow execution engine, webhook/polling/cron triggers, multi-tenant RBAC, Redis caching, and Razorpay billing on GCP Cloud Run.
- Architected a multi-agent AI platform of **27+ specialized LangGraph agents** behind a FastAPI service, with PGVector-backed RAG over marketing and analytics data, MongoDB/Postgres checkpointing, and credit-based metering.
- Designed an MCP orchestration layer with per-session subprocess isolation and Plan-and-Execute agents, exposing **10+ integration servers** (Gmail, BigQuery, Notion, PostgreSQL) to user-configurable custom agents.
- Shipped a natural-language workflow copilot on LangGraph state machines that compiles plain-English prompts into executable multi-step workflows, cutting build time from **30+ minutes to under 2**.
- Built the **React 19 / TypeScript** product frontend: a React Flow visual workflow builder with 250+ connector nodes, OAuth integration management, an AI agent workspace with live tool-call streaming, and multi-workspace billing.

Blueera Technologies Dec 2024 – Apr 2025

Software Engineer Remote

- Built Spring Boot microservices and tuned **15+ legacy Oracle/SQL Server queries**, lifting API throughput ~30% and cutting report generation from 8s to under 5s.
- Stood up GitHub Actions and AWS CodePipeline CI/CD with CloudWatch + X-Ray tracing, removing **~80% of manual deploy effort** and halving incident MTTR.

Walmart Global Tech Jul 2022 – Aug 2024

Software Engineer III Atlanta, USA

- Owned the OrderCentral real-time supply-chain dashboard for Sam's Club, serving **200+ daily stakeholders** and eliminating 15+ hours/week of manual reporting.
- Resolved 3 critical production failures in the ClubOrdering mobile app, cutting order-entry errors ~25%, and supported Kubernetes deployments holding **99.9% uptime** over millions of monthly transactions.

Tata Consultancy Services Aug 2019 – Aug 2020

Software Engineer Indore, India

- Built an AWS-hosted recruiting platform that cut average vacancy fill from **40 to under 15 days**.

PROJECTS

- Rayni** (Advisor, 2024-25) Advised technical architecture and hiring strategy for an early-stage startup that raised \$1M+ in seed funding.
- FloodIndex.tech** (2021) Built a NASA-collaborated analytics platform identifying high-risk healthcare facilities during flood events.

EDUCATION

Rensselaer Polytechnic Institute *Master of Science, Information Technology* 2022

Rajiv Gandhi Technical University *Bachelor of Engineering, Computer Science* 2019
